### ***Response to Arguments***

1. Applicants' amendments and arguments, filed on 10/25/2007, with respect to Claims 1, 3-5, 10, 26, 28 and 29 have been fully considered. The 35U.S.C. 103(a) rejections have been overcome by rewritten those objected claims – dependent claims in independent form including all of the limitations of the base claim and any intervening claims.

### ***Allowable Subject Matter***

2. Claims 1, 3-5, 10, 26, 28 and 29 are allowed.
3. The following is an examiner's statement of reasons for allowance.
  - The prior art fails to teach an apparatus of Claims 1 that specifically comprises the following:
    - The instant application is deemed to be directed to a non-obvious improvement over the admitted prior art of the instant application and the invention patented in Pat. No. US 5,752,218, US 6,070,078 and US 6,304,261. The improvement comprises "wherein the determining a code phase of each among a plurality of received signals comprises calculating a correlation, for each among the plurality of received signals, between a corresponding code sequence and a signal based at least in part on the composite signal; wherein each among the code phases relates to a

corresponding predetermined position within the corresponding periodic code;" as recited in combination of other limitation as claimed in claim 1.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
